

Exclusive Discounted Price DAIKIN 'New Old Stock'

DAIKIN VRV/VRF INDOOR UNITS

Summary of All Available Products

◆ Indoor Units

A wide mix of wall-mounted, cassette, concealed, and floor-standing models. Perfect for **system expansions, retrofits, and immediate replacements**. These units are in **high demand** by contractors who need to service active Daikin VRF systems.

◆ Outdoor Units

The **powerhouse of VRF projects**. These outdoor modules are **difficult to source anywhere else** and are essential for unlocking capacity in new projects and urgent retrofits. Stock is limited — once gone, projects depending on these models will be delayed or lost.

◆ Split Units

Complete indoor/outdoor pairs including **Ururu Sarara, Nexura, Emura, Concealed, and Ceiling Suspended ranges**. Highly attractive for the **residential and light commercial market**, where demand for reliable split systems remains strong.

◆ Accessories

Critical project components: **ventilation units, decoration panels, controllers, remotes, refnets, and chilled FCUs**. These parts are often the bottleneck that delays installation. Having them in stock gives you a **clear edge over competitors**.

◆ Spare Parts

Rare **original Daikin spare parts** for older systems, covering models from 2009–2017. These are especially valuable for **servicing discontinued lines**, helping contractors keep existing installations alive and customers satisfied.

📌 **Important:** Stock is available in **bundles only**. The more bundles you secure, the stronger your price advantage and priority in the allocation process.

👉 **Auction closes October 9, 2025.** Don't wait — register now to view full catalogues and submit your interest.

Why This Stock Is Special

This isn't just any inventory; it's a strategic asset for your business. We've secured a limited quantity of **original Daikin VRF Indoor Units** that have been meticulously preserved as New Old Stock. This means you're getting authentic, high-quality products in perfect condition, ready to integrate into existing systems or cater to new projects.

Genuine Daikin Products

These units are original Daikin products, ensuring reliability and performance for your projects.

Rare Market Availability

Due to supply chain dynamics, these specific models are incredibly hard to source elsewhere, giving you a competitive edge.

Versatile Application

Ideal for system expansions, maintaining spare capacity, or profitable resale in your target markets.

Products in High Demand

Buyers across Europe, the Middle East, Africa, and Russia are actively seeking these exact units.

To maximize your advantage, this stock is exclusively offered in **bundles**, not individual units. Furthermore, a tiered pricing structure means **the more bundles you wish to get from stock, the more significant your savings and the stronger your market position becomes**. This is a unique opportunity to secure essential inventory that others simply can't find.

Available Indoor Units

This table details the specific models available, their original specifications, and the quantities available for purchase.

This inventory represents a unique opportunity to access specific Daikin VRF Indoor Units that are increasingly difficult to source through conventional channels. Contact us for detailed specifications and to discuss the optimal bundle configuration for your needs.

Get An Advantage in Your Market

Securing these Daikin VRF Indoor Units provides more than just inventory; it offers a substantial competitive advantage in a demanding market. These units represent a rare opportunity to fulfill urgent client needs, expand your offerings, and solidify your position as a reliable supplier/installer.

Rare Opportunity

These specific models are no longer readily available through standard distribution channels, making this acquisition a unique strategic move for your business.

High Demand

Many existing HVAC systems worldwide still utilize these exact models, creating strong demand for replacements, expansions, and spare parts. This stock directly addresses that critical need.

Strategic Location

Located in Cairo, our stock is optimally positioned for **efficient and rapid shipment** to key markets across Europe, the Middle East, and Africa, minimizing logistical delays and costs. We can ship anywhere, in any method.

Discounted Price Advantage

Purchasing in bundles provides significant cost efficiencies and strengthens your supply position, allowing you to offer competitive pricing and immediate availability to your clients.

This limited-time offer empowers you to overcome supply chain challenges and meet immediate market demands with premium, hard-to-find Daikin products.

Limited Time Offer, Auction Ending Soon

Exclusive Daikin VRF Indoor Units - Auction ends in 45 days during the first week of October 2025.

Limited supply, high demand. Secure these rare models before they're gone.

**Exclusive
